

At the present time, the population of some countries includes a relatively large number of young adults, compared with the number of older people. Do the advantages of this situation outweigh the disadvantages?

These days, many countries have a higher proportion of younger people than older ones. Although ~~as every aspect in this life has both positive and negative sides~~ there are decided advantages and disadvantages to any topic as complex as this, I think the ~~disadvantages~~ ~~drawbacks~~ of this far outweigh the ~~advantages~~ ~~positives~~.

On the one hand, a young population brings ~~high~~ ~~greater~~ potential ~~to~~ ~~for~~ economic and social progress. For example, after the war between the north and the south of Vietnam had ended year 1975, people ~~came back~~ ~~returned~~ to ~~their~~ daily ~~liv~~ ~~es~~. This along with ~~out~~ good family planning is one of ~~the~~ reasons why ~~the~~ young population ~~keeps~~ ~~majority number in the country in recent years~~ ~~has become so large in recent years~~. Young people easily learn and adapt to new technology and ~~renovation~~ ~~innovations~~, thus the economy has massive resources of competent and flexible employees. ~~Reality proved that~~ Vietnam's GDP growth has ~~been considerably~~ increased ~~considerably~~ over ~~the last~~ 50 years and it will continue ~~to~~ ~~ously~~ increase.

On the other hand, young people, especially children and adolescents ~~who~~ are dependents and need good quality of education. If they ~~do~~ ~~are~~ not ~~be~~ well educated and they do ~~not have~~ ~~qualified~~ ~~have not developed the~~ skills ~~necessary~~ ~~ed~~ for good jobs, chances are they ~~would~~ ~~will~~ become ~~the~~ ~~a~~ burden ~~on~~ ~~f~~ society. In many developing countries like Vietnam, where tax money has ~~to~~ ~~been~~ ~~allocated~~ ~~to~~ ~~divided~~ ~~for~~ many fields other than education, there are numerous young children ~~who~~ cannot go to school. The country has nearly 2 million people who are illiterate. Those people ~~are~~ mostly live in suburban and highland areas. Public schools are not free, they cost an ~~inordinate~~ amount of money that many poor families cannot ~~pay~~ ~~for~~ ~~afford~~. Furthermore, chronic unemployment for youths can lead to crimes, drugs and others social disease such as HIV ~~in some cases~~.

In conclusion, although I concede that ~~the~~ young generations are ~~the~~ future of ~~the~~ ~~any~~ country, we cannot deny the fact that ~~making~~ ~~building a~~ good environment for them to grow is a real challenge. I think governments needs to provide a lot more financial aids ~~s~~ for education ~~if they want to support a demographically young population~~.
