

Some people think instead of preventing climate change, we should find ways to live with it.

To what extent do you agree or disagree?

Some people argue that ~~people are supposed to find~~ it is logical to implement sensible ways-methods to ~~put up with~~ tolerate climate change rather than seeking to averting it. Personally, I largely/generally ~~tend to~~ disagree with this opinion because preventing climate change ~~can improve level of~~ is absolutely crucial to improving human health.

On the other hand, ~~concerned citizens who have proposed living in peace with climate change can also find reliable financial reasons.~~ Averting the climate change entirely from occurring would be a massive project that would cost an incredible amount of resources, while living with it would save a lot of financial expenditure. ~~For example, in China the government has attempted to invest in green infrastructure projects such as wind farms and electric vehicles in recent years due to the worsening environmental conditions. These projects have been successful but place a burden on the budget that requires sacrifices in terms of developing rural schools and investing in healthcare.~~

There is ~~no little~~ doubt that avoiding climate change can help humans ~~become more healthier than past~~ guarantee health in the future. First of all, ~~because of preventing it by preventing global warming,~~ authorities would naturally encourage people to reduce ~~rates of driving of primate~~ vehicles and this might ~~bring out result in fewer less~~ noxious fumes from cars, which ~~can would~~ provide humans with increasingly ~~sanitary survival environments~~ clean air to breathe. ~~Moreover~~ Secondly, ~~numerous~~ global factories ~~might be would likely be~~ required to recycle their waste water and sewage containing chemical ~~elements~~ pollutants. As a result, the quality of rivers and streams ~~will would become~~ cleaner, contributing ~~to individuals drinking the sterile~~ drinking water and preventing suffering from ~~illnesses such as dysentery, malaria, and Minamata disease.~~ ~~Therefore, people could stay away from many diseases such as malaria and keep fit due to the improvements of climate change.~~

~~On the other hand, people who have the idea of living in peace with climate change can also find a reliable reason from financial perspective.~~ Averting the climate change entirely from happening would a project of greatness that might cost an incredible amount of money, while living with it can save a lot of financial expenditure. ~~However, health issues of human play a key role in human society, although this project might cost a huge budgetary expenditure. Therefore, it is indispensable to solve climate change issues at all costs.~~

To sum up, I believe that the significance of preventing climate change is more important than living with it because ~~of the demanding of improvements in~~ value of

Comment [Dave1]: good, difficult but comm

Comment [Dave2]: a little informal

Comment [Dave3]: really good phrasal verb for

Comment [Dave4]: try to write this sentence

Comment [Dave5]: the topic is clear, mostly

Comment [Dave6]: a little informal

Comment [Dave7]: a little stronger

Comment [Dave8]: clear overall opinion –

Comment [Dave9]: good common collocation

Comment [Dave10]: justifications

Comment [Dave11]: should be around 15

Comment [Dave12]: said the same almost in

Comment [Dave14]: most of the paragraph is

Comment [Dave13]: really specific examples

Comment [Dave15]: the same things you said

Comment [Dave16]: this paragraph still a little

Comment [Dave17]: a little weaker – there's

Comment [Dave18]: people are already

Formatted: Font: Bold

Formatted: Font: Bold

Formatted: Font: Bold

Comment [Dave19]: countable – so use fewer

Comment [Dave20]: not an English collocation

Comment [Dave21]: you need to learn the

Comment [Dave22]: some over-use of linking

Comment [Dave23]: if you are trying to save

Comment [Dave24]: there are no strict rules

Comment [Dave25]: should be around 15

Comment [Dave26]: the TA is lower bc there's

Comment [Dave27]: said the same almost in

Comment [Dave28]: most of the paragraph is

Comment [Dave29]: the same things you said

Comment [Dave30]: wasted paragraph

Comment [Dave31]: repeat your opinion –

health. Governments should continue to invest in green initiatives.

Some people think governments should focus more on reducing environmental pollution and housing problems to help people prevent illness and disease. To what extent do you agree or disagree?

Some people argue that the authorities should pay more attention to environmental pollution and housing problems in supporting individuals ~~averting/avoid~~ ailments and sickness. From my point of view, I tend to disagree with this view because the spreading of health consciousness and usage to ~~advance~~ technologies ~~had~~ have a more significant impact on ~~stopping~~ disease preventions.

There is ~~no~~ little doubt that to some extent environmental ~~contaminations~~ problems and poor housing conditions ~~can lead to some~~ are catalysts for various diseases ~~to some extent~~. ~~In terms of environment,~~ with the development of the automobile industry, ~~the~~ has environment will be significantly ~~affected and negatively impact the environment~~ because of the number of existing private vehicles ~~existing~~, such as trucks, vans and cars ~~that exhaust a large volume of fumes produce noxious gases,~~ which can cause individuals to suffer from respiratory diseases. ~~In terms of housing problems, nowadays,~~ ~~although people have already worked in beautiful and spacious buildings,~~ there are still numerous problems that could be fixed. For example, if employees have been working in ~~a~~ an older, -sealed buildings for a long time, the rate of ~~having a cold~~ spread for fairly innocuous diseases such as the common cold and more serious ones like Covid-19 ~~in these areas~~ is higher ~~than that in nature~~ due to the lack of ventilation.

Comment [Dave32]: clear opinion – relevant main ideas but poor development in the other side paragraph

Comment [Dave33]: you can get this to a 7

Comment [Dave34]: clear ideas and paragraphing, not too many major mistakes

Comment [Dave35]: problems with really complex vocab but simple and easy to understand mostly

Comment [Dave36]: some good accuracy – some sentences with no mistakes and some good complexity

Comment [Dave37]: include a short final thought at the end

Comment [Dave38]: very similar topic

Comment [Dave39]: good clear intro – a little long – if you need to save time, you don't have to include your main ideas here (good to do it, but not 100% necessary)

Comment [Dave40]: try to simplify your topic sentences a little bit more

Comment [Dave41]: ok topic sentence

Comment [Dave42]: always 'the' environment

Comment [Dave43]: try not to use the same word twice in one sentence

Comment [Dave44]: kind of a long run-on sentence but ok – try to have a short sentence after – if you have a really long one, follow it with a shorter one

Comment [Dave45]: irrelevant – save some time and don't include it

Comment [Dave46]: focus on the fact these buildings are older so the government could fix them and then that would help improve health

Comment [Dave47]: good ideas, good development, little issues but strong overall and good structure

However, environmental pollution and housing problems are not the ~~only factors resulting in body problems~~ chief causes that need addressing. Other aspects like health awareness and advanced medical care can ~~also~~ better help ~~people~~ individuals avoid ~~infecting~~ illness. From the perspective of ~~general public~~ awareness, governments should run campaigns to ~~arouse people's awareness~~ educate the citizenry about ~~towards~~ certain ~~key health~~ issues ~~in health~~, such as obesity, ~~and~~ high blood pressure, and ~~diabetes~~ other kinds of diseases. As a result, individuals can ~~gain knowledge~~ make informed changes in their lifestyles related to nutrition and exercise, ~~and might make up their minds to keep healthy~~. From the perspective of medical care, a ~~more~~ advanced medical system could help ~~people~~ residents from all classes to ~~get~~ receive ~~proper~~ the most modern and effective treatments. For example, ~~the poor~~ underprivileged segments of society might ~~be~~ no longer ~~to~~ need to worry about ~~unaffordable~~ ~~exorbitant~~ medical fees, ~~and they can be immediately cured their health issues~~ and might survive treatable conditions such as operable types of cancer.

In conclusion, although improvements in environmental pollution and housing problems help people prevent illness, I still believe that other forms such as advances in medical care and people's health awareness are ~~more important~~ ~~than these aspects~~. Governments should prioritize these areas to fulfill their responsibility to the citizenry.

Vocabulary: 6/7
Grammar: 6
Overall: 6/6.5

Comment [Dave48]: you need to focus on the fact there are bigger reasons to make your opinion crystal clear

Comment [Dave49]: a little shorter and simpler topic sentence – better!

Comment [Dave50]: also isn't strong enough

Comment [Dave51]: makes your opinion clearer

Comment [Dave52]: prohibitively high

Comment [Dave53]: a little more specific with your details

Comment [Dave54]: really good paragraph – great development, clear linking of ideas

Comment [Dave55]: excellent – keep doing this – makes your opinion really clear! try to do it in the intro and at the beginning of the 3rd paragraph 'throughout' – makes it more consistent, helps your TA and CC

Comment [Dave56]: good clear conclusion – try to be a little more concise and summarize a little faster

Comment [Dave57]: aim for about 275 – 300 words and 40 minutes
