

1. The chart below shows three different crimes and the number of cases committed between 1970 and 2005 in England and Wales.

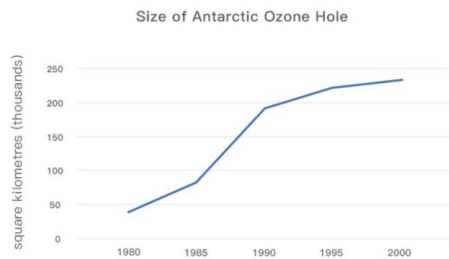

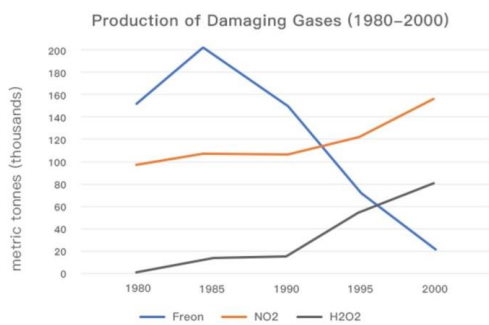

Overview:

Overall, the number of cases in all three forms of crimes had risen by 2005. The same pattern was witnessed in terms of car thefts and house-burgling, which climbed at first and fell during the following years, while much less changes was seen in street robbery. Band 7-9

2. The line graphs show the size of ozone hole in Antarctic and three types of damaging gases that damage the Antarctic ozone from 1980 to 2000.

Comment [Dave1]: Great!

Comment [Dave2]: This is ok but it you already covered the trend – no need to talk about the rise and fall – that’s a little too detailed. You can use this acronym to rememeber: TSR
 T- Trend
 S – Speed
 R – Ranking
 Trend is the most important – cover that 100% for all areas. After that you can just mention a bit about the speed or ranking depending on the graph. For example, in this one, it stands out that car thefts were most common throughout almost the entire period – and that they showed the greatest increase.

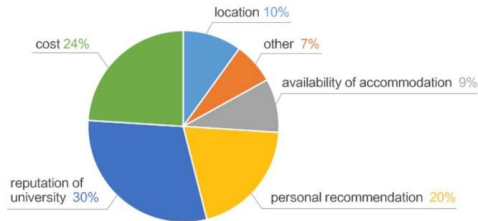

Overview:

Overall, the size of Antarctic Ozone Hole grew significantly during the period, although the speed of growth slowed down in later years. When it comes to damaging gases, there is a similar upward trend in production of NO2 and H2O2, while the production of Freon showed a downward trend after peaking in earlier years early on. Band 7-9

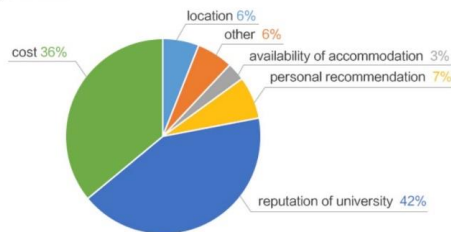

3. The chart below show the result of surveys asking undergraduates and postgraduates why they chose Vaster University.

Comment [Dave3]: Perfect! Again, don't stress so much about peaks in the overview – just the overall from beginning to end but this one is great!!!

undergraduates

postgraduates

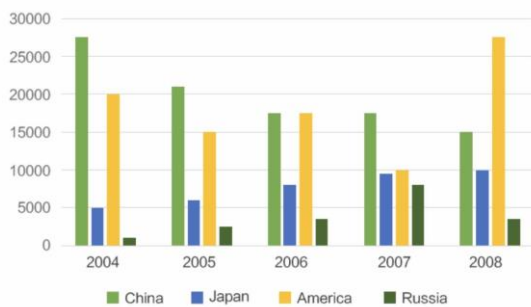

Overview:

Overall, cost and reputation are the major factors taken into account both for undergraduates and postgraduates, with location and accommodation the least. It is noticeable that personal recommendation become less important for postgraduates compared with undergraduates. **Band 6**

4. The chart below shows the number of international applicants from four countries that a European university had from 2004 to 2008.

The number of international students applying for a European country

Overview:

Overall, aAn opposite trend is can be observed in the number of Chinese applicants and Japanese applicants, with the former decreases and the latter increases, whereas the number of American applicants and Russian applicants fluctuated over the period. **Band 5 (because no overall trend for Russia and America)**

5. The table below shows the income and expenditure of Harckley Hall, a public place for

Comment [Dave4]: You'll notice for these there is not trend (because there is no time), so it is all ranking. Also mention other as having the least along with location and accommodation. Great!

Comment [Dave5]: With + ing or as + ed (as the former increasing / with the former increasing)

Comment [Dave6]: Just saying fluctuated isn't enough and you will get band 5 – American and Russian applicants increased overall despite fluctuations. Good to say that by the end American applicants had overtaken Chinese ones (so a bit of the ranking). TSR (no need for speed on this one unless if want to mention it)

hiring over the period of three years.

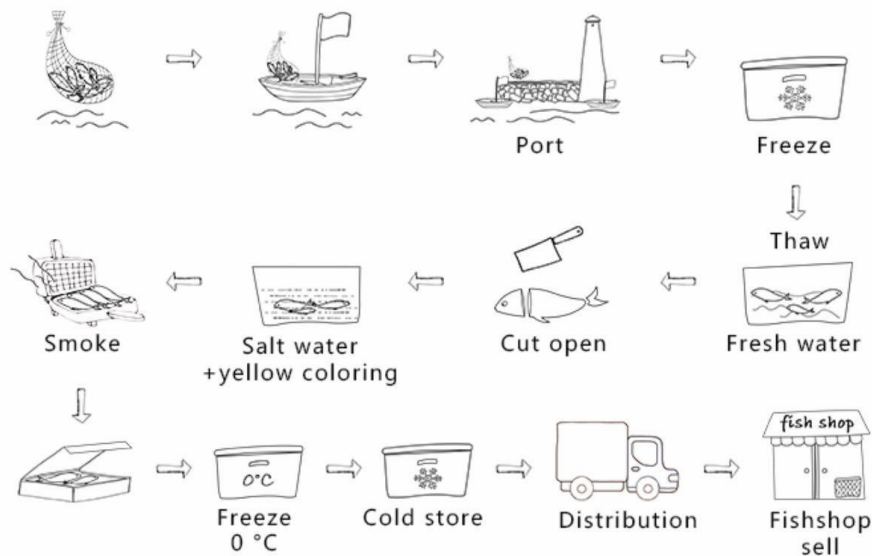

| | Year1 | Year2 | Year3 |
|----------------------------|------------|------------|------------|
| Income of Hiring room | £34,000.00 | £35,000.00 | £32,000.00 |
| Income of Café | £3,500.00 | £3,000.00 | £4,000.00 |
| Funding from Local Council | £22,000.00 | £22,000.00 | £21,000.00 |
| Funding from Other sources | £24,000.00 | £25,000.00 | £27,000.00 |
| Total Income | £83,500.00 | £85,000.00 | £84,000.00 |
| Expenditure | £56,000.00 | £60,000.00 | £62,000.00 |
| Profit | £27,500.00 | £25,000.00 | £22,000.00 |

Overview:

Overall, there is an increase in income ~~of~~ in the café and funding from other resources, whereas a decrease in that of hiring rooms and local councils. The total income and expenditure has grown during the 3 years, with the profit dropping throughout the period.

Comment [Dave7]: Great!

6. The diagram presents the process of producing smoked fish.

Overview:

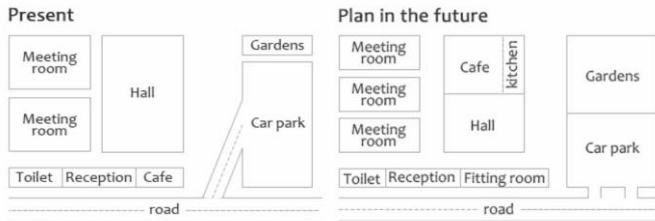

Overall, 13 steps constitute the procedure of processing smoked fish, including earlier phases ~~of~~ involving collecting the raw materials and transportation, ~~later~~ the middle phases of processing and cooking the fish, and the final phases ~~of~~ related to storage ~~storing~~ and delivery.

Comment [Dave8]: Perfect!

Band 7-9

7. The map below show a conference center as it is now, and plans for its development.

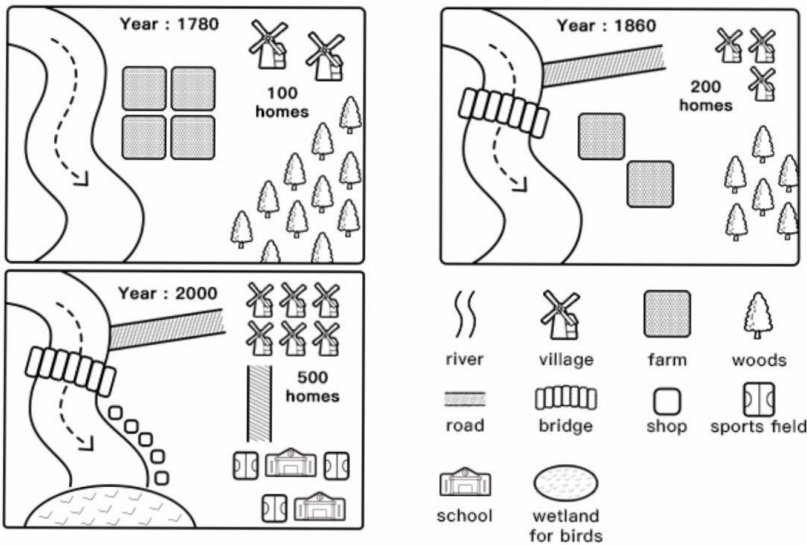

Conference Center

Overview:

Overall, the main structure of the conference center will remain almost unchanged, while another an additional entrance will be built and more room is going to be used for recreation. Band 5

8. The maps below show the changes that occurred to a town named Willington in 1780, 1860 and 2000.

Overview:

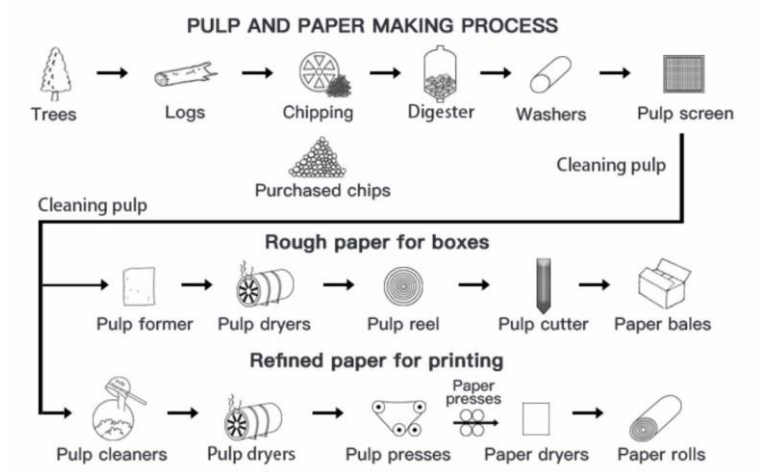

Overall, many changes have taken place in Willington during over 200 years, with more houses constructed, places for recreation and education added, transportation developed and farms demolished. Natural resources like the woods has-have been reduced gradually, but a wetland for birds was built. Band 7-9

Comment [Dave9]: Where is the other entrance? You mean the route to the car parks will change?

Comment [Dave10]: Remain almost unchanged could be a little clear – some rooms will be broken up into more rooms, including meeting rooms and areas for dining

Comment [Dave11]: Perfect!

9. The diagram presents how pulp and paper is made.

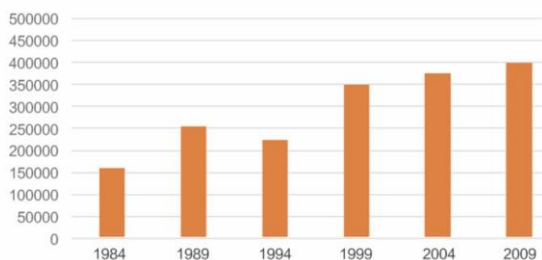

Overview:

Overall, six steps are used for processing clean pulp and additional five steps are needed both for producing rough paper and refined paper, while the tools and stages vary in processing the two different forms. [Band 5](#)

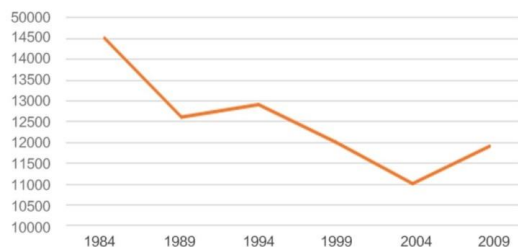

10. The charts below show the number of university students in a particular country and how much the government spent on each student between 1984 and 2009 as well as the financial condition of the students' families.

The number of university students in a country

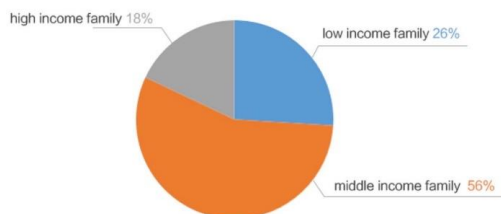

Comment [Dave12]: No enough detail – it is a tough one to group but try doing the same overview like before with early stages involving the raw materials, middle ones focused on processing the pulp and the final stages during which paper is produced. Sometimes there is a chemical or physical transformation that you can note – this is a tough process and maybe not a real one so I wouldn't worry about it.

Governmental Spending per Student (dollars)

The Economic Background of Students' Family

Overview:

Overall, the number of university students has increased over the period, while less money has been spent for ~~an~~ each individual. When it comes to family background, the majority of students receiving aid come from middle income families, followed by low income families and with the least seen in high income families. Band 6

Comment [Dave13]: Be sure to include the low income families in the ranking.
